

A Heated Affair with Angelina

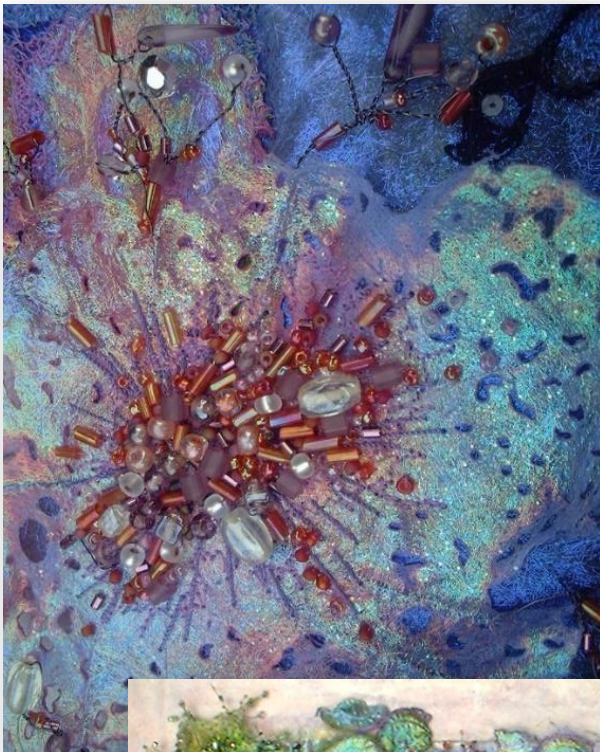

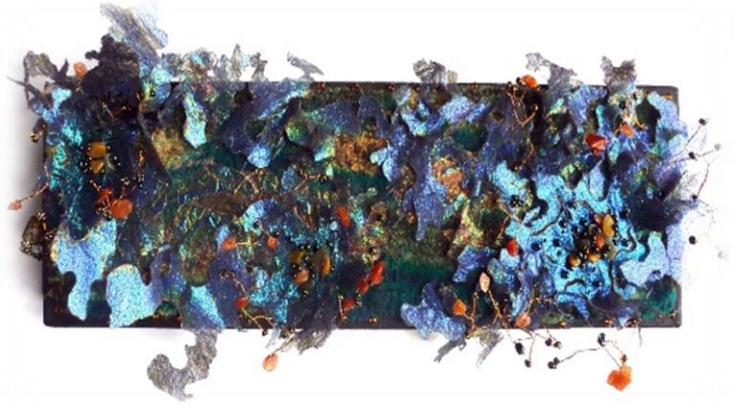

9th - 10th January :

with... **Alysn Midgelow-Marsden**

New Zealand

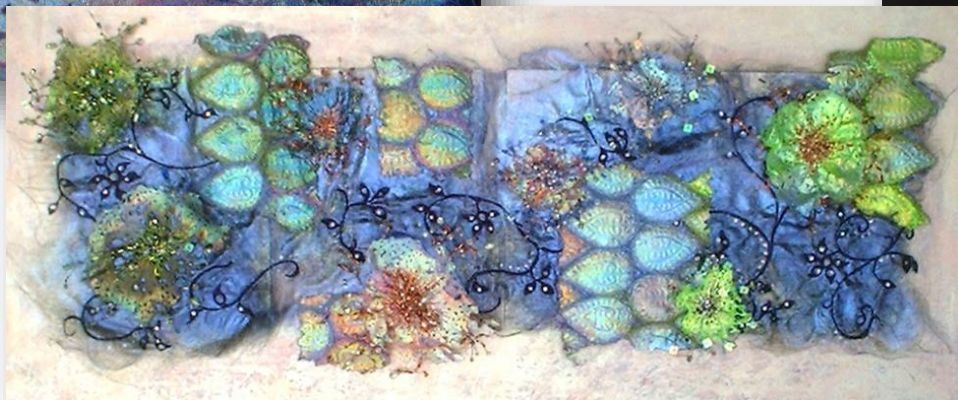

Two day workshop

In this course you will exploit the textured surfaces which can be developed by fusing and melting Angelina fibres. This pushes the usual boundaries of the fibres and includes my continued use of heat and flames to create interesting surfaces.

Use lustrous, over the top combinations of Angelina fibre, wires, beads, soldering, burning and hand stitch to develop a wild embroidery by layering and stitching, or keep it simple in colour and tone, enjoying the lustre and texture of the fibres along with stitch and other embellishments.

Suitable for
all levels of
experience
